

IDAN EFRAIM

Red Team Leader

Phone: 052-2846817 | Email: idanefraim13@gmail.com

PROFILE

Red Team Leader specializing in adversary emulation and advanced offensive operations across cloud and on-premise environments. Deep expertise in application, cloud, and web penetration testing - hunting misconfigurations and driving remediation. Dual attacker/defender perspective backed by a strong foundation in secure architecture and infrastructure hardening.

EXPERIENCE

Red Team Leader / Mamram Cyber Division, J6, IDF 2025 – Present

- Lead full-scope Red Team operations across cloud (AWS, Azure, GCP) and on-premise environments, emulating advanced real-world adversaries end-to-end to surface critical, exploitable security gaps and deliver prioritized findings with actionable remediation guidance to technical teams and leadership.
- Plan and execute multi-stage attack campaigns, chaining initial access, privilege escalation, lateral movement, and persistence into complete kill-chain demonstrations.
- Conduct full-scope penetration testing across the code, cloud, and web layers of target systems – including exploiting application and web vulnerabilities, escalating IAM privileges, abusing identities and abusing misconfigurations across public-cloud environments
- Map and exploit identity attack paths across large Entra ID and Active Directory environments using BloodHound, executing stealth-focused on-premise attack chains - Kerberos abuse, lateral movement, persistence, and full domain compromise - while evading detection and bypassing EDR and defensive controls to test true detection.
- Conduct collaborative penetration testing alongside fellow Red Teams, sharing access, tooling, techniques and tradecraft to coordinate multi-team attack campaigns and maximize coverage across complex environments.
- Integrate AI-driven agents into attack workflows and development, boosting efficiency across reconnaissance and exploitation.

Cyber Defense Team Leader / Mamram Cyber Division, J6, IDF 2023 – 2025

- Designed and developed custom security mechanisms that were deployed into production and adopted operationally.
- Integrated commercial solutions from Palo Alto, Cisco, and Microsoft into the organization's defensive stack.
- Led the enterprise PKI team, running HSM-protected certificate authorities and standards-aligned cryptographic implementations.
- Engineered a secure development pipeline that empowered independently development while enforcing secure-coding standards.

Infrastructure Engineer / Mamram Digital Engineer Division, J6, IDF 2021 – 2023

- Served in the Microsoft Systems Division, managing key infrastructure components including Active Directory, Exchange, Skype, SCCM, and FIM and building systems on top of them.
- Built and maintained enterprise systems based on Microsoft best practices and cybersecurity standards.
- Built web applications leveraging enterprise authentication and directory services to provide secure, role-based access to infrastructure management capabilities.
- Completed multiple Microsoft-certified internal trainings.

EDUCATION

M.Sc. in Computer Science / Bar-Ilan University, Israel 2025 – Present

- Focus: Cybersecurity

B.Sc. in Computer Science / The College of Management Academic Studies 2022 – 2025

IDF Officer Training / BHD 1 2023

Programming Course / Bsmch, IDF 2020 – 2021

Magshimim National Cyber Program / Israel's elite national cybersecurity excellence program 2018 – 2020

MEET – Middle East Entrepreneurs of Tomorrow / MIT-affiliated CS & Entrepreneurship program 2017 – 2018

AWARDS

Commander of Mamram Excellence Award 2025

PUBLICATIONS

- "Python Code Injection" / Digital Whisper Magazine, Issue #155
